(2015, July). [Waste Prevention Scenarios Using a Web-Based Tool for Local Authorities](#). In Waste and Biomass Valorization Journal. Springer Netherlands.

EXPERIENCE

Greek Army

XVI M/K ΜΠ Διόχου
December 2014–July 2015

IT Support

- Assisted personnel over IT related matters.
- Hardware and software repair and maintenance of terminals.

Harokopio University
Athens, GR
July 2014-September 2014

Full-Stack Developer and Designer

Full stack development and design of the Waste Prevention Support Tool (the WASP-Tool) for the Department of Geography. The tool is a web-based expert system, based on local and aggregated data concerning the waste composition and the demographic characteristics of an area. It examines and evaluates the effectiveness of possible waste prevention strategies.

The back-end was implemented using Ruby on Rails while Bootstrap was used on the front-end.

Athens, GR
March 2012-September 2014

Research Associate

Customized and deployed

a CAS that authenticates off of a Drupal MySQL database. Also, created a web application that presents users with the available services according to their type.

Chesterfield Couture
Remote Job
January 2014-July 2014

Frontend Developer and Designer

Contract work. Magento front-end development for both the desktop and mobile versions of the site plus design work for the later. Through the course of development the process consisted of continuous client meetings and design updates.

The goal of the redesign was for the company to

- register more client brochure requests [achieved 8x more],
- increase online sales [achieved 15% increase] and
- have a mobile presence [increased traffic and engagement].
